

Jim Fleming
Colby College

Jim Fleming (Ph.D. Princeton) is a historian of science and technology at Colby College. Books include *Meteorology in America, 1800-1870* (1990), *Historical Perspectives on Climate Change* (1998), *The Callendar Effect* (2007), and his latest, *Fixing the Sky*, forthcoming from Columbia University Press. Awards and honors include the Roger Revelle Fellowship from AAAS and election as a AAAS Fellow; sabbatical fellowships from NSF, the National Air and Space Museum, and the National Endowment for the Humanities; and visiting appointments at MIT, Harvard, the National Academy of Sciences, and the Woodrow Wilson International Center for Scholars. Jim is the founder and first president of the International Commission on History of Meteorology, editor of *Osiris* 26 on Climate and Cultural Anxiety, history editor of the *Bulletin of the American Meteorological Society*, and series editor of Palgrave Studies in the History of Science and Technology.
